I have been active with the RPSTA/STF for most of my Regina Public teaching career and wish to continue to represent Regina Public teachers to the STF. My personal agenda when representing Regina Public is to keep our fees reasonable while accepting that things we want may cost money. I would like to see more options in our benefits allowing for individual teachers getting what they need. I support allowing the elected STF executive to make decisions on our behalf while expecting transparency, reporting to the membership and accountability. I am committed to listening to our members and representing their collective wishes.

I encourage all members to attend mini-council to let your councillors know the voice of Regina Public. Your voices can only be heard if you use them.
