Why you are running for the position?

- I want to continue work experience gained on the above committees and be a strong voice when communicating with key decision-makers.
- Due to COVID, mental and physical health and safety remain areas of concern
- We're experiencing a challenging time in Saskatchewan's education sector. The role of a teacher as a professional capable of making independent decisions erodes with a lack of funding and autonomy. I'm committed to putting in time and energy to reaffirm our value

What issue(s) you hope to tackle, support, or advocate for during your term, if elected.

- COVID showed the consequences of overcrowding, lack of windows, and large class sizes, among other problems, on our ability to function as teachers and as societies province-wide. Mental and physical health, class size, composition remain huge priorities
- Wages that meet or exceed the cost of living and make our job attractive, enhanced benefits
- Unique needs that support subgroups and situations that resonate with them (early learning , guest/substitute teachers and administrators are two examples, please contact for more info)
